Course Description

The course offers a structured approach to managing projects effectively, starting with an understanding of the project environment. It outlines the various roles of participants involved in a project, their responsibilities, and their contributions.

The course also focuses on the identification of key deliverables essential for project success, and emphasizes the importance of meticulous project planning and management. Additionally, students will explore the 3P Method (Planning, Process, and People), a core concept that integrates strategic planning, efficient process implementation, and effective people management in project execution.

This course is shared with Master 2 Eachat

Learning Outcomes

- Navigate the project environment and lead projects from inception to completion.
- Outline the various roles, responsibilities, and contributions of project participants.
- Identify and manage key deliverables that are essential for project success.
- Apply meticulous project planning and management techniques.
- Implement the 3P Method to successfully integrate strategy, processes, and people.

Indicative Content

- 1. Project Environment:** Understanding the foundations of structured project management.
- 2. Roles and Responsibilities:** Outlining the contributions of various project participants.
- 3. Key Deliverables:** Identifying and managing the essential outputs for project success.
- 4. Project Planning:** Best practices for meticulous project planning and oversight.
- 5. The 3P Method:** Integrating Planning, Process, and People in project execution.

Teaching & Learning Approach

This course is structured around a combination of theoretical frameworks and practical methodologies. Instruction bridges the concepts of strategic planning and efficient process implementation with the human elements required to lead successful projects.

Assessment

Written Exam
